

Data Dictionary

| Term | Definition & Information | Aliases |
|---------|---|-----------|
| Token | A representation of the player on the gameboard. It takes the shape of a circle. Each player has their own specific token color. | Pieces |
| Barrier | Set amount of barriers are set across the board. Unless and until a player lands on a barrier, they will not be able to move past that barrier. Any player landing on the barrier can choose to place a barrier across any part of the board. | Barricade |
| Hints | Upon selecting the player's token, the system will highlight the spaces on the board where the token can move according to their die roll. | |
| Theme | Users will be given the option to choose different colors or symbols for their tokens. In which, one of the option will be for the color deficient users. | |
